

TECHNICAL MANAGER

AUCKLAND INTEGRATED FARES SYSTEM

Auckland Regional
Transport Authority

Position Type: Full Time, Fixed Term to end June 2012
Closing Date: Noon 29 March 2010

The key role of the Auckland Regional Transport Authority (ARTA) is to plan, fund and develop the transport system for the Auckland region. Our mission is to deliver a world-class transport system that makes Auckland an even better place to live, work and play.

ARTA is embarking on an exciting project to deliver a new public transport ticketing system for the Auckland region. The Technical Manager is one of four key project positions required for the successful development and delivery of the Auckland Integrated Fares System (AIFS). This position provides the specialist technical input, management and leadership to the AIFS project. It is a fixed term, full time role until the end of June 2012.

To be successful, you will have formal qualifications relevant to the role plus extensive and demonstrable technical experience in smartcard-based transit ticketing projects. Demonstrable experience in the management of technical work streams for complex, technology and systems oriented projects is essential. Technical management experience in multi-operator, multi-modal fare collection projects and knowledge of and experience in the specification and development of smartcard interoperability standards would be an advantage.

This is an exciting project that is a key element of the Auckland Regional Land Transport Strategy, will make public transport much more attractive to Aucklanders, and help realise the potential of the region's public transport network.
